

# XOS AFO

Hanger XOS is an AFO system which integrates a Fabtech System PDE strut mounted onto a shoe. The AFO is designed for easy donning and doffing, to optimize limb alignment and to foster a healthy foot and ankle complex.

## Features

1. Laminated calf section with adjustable anterior closure
2. Patient specific posterior strut and carbon footplate  
*Note: Shoe required. Footplate is embedded into the sole of the shoe*
3. PTB variation is available on request

## Indications

- Neurological presentations
- Partial foot
- Ortho/trauma/limb salvage
- Pediatric designs are available

## Consideration

- ◆ The superstructure is embedded directly into the shoe wear and is not removable by the patient, but can be removed and transferred to a new shoe.
